PARCHMENT MATTE

The Parchment mattes have a subtle and sophisticated surface quality. Quietly textural and semi transparent surface quality. Parchment matte colors were designed to complement, or in some cases, match many of the R-gloss and Watercolors. They are suitable for all vertical as well as floor and counter uses. All Parchment Mattes come standard on smooth field tile

GLAZES

RC CRACKLE

These are crackle surfaced, glossy glazes in creamy transperants, whites and soft colors. These glazes are primarily for vertical surfaces. A colored grout or commercial stain can be used to add contrast to the crackled lines. A II RC crackles come standard on smooth field tile.

GLAZES

WATERCOLORS

Named so because of its deep, fluid clarity. On a relief tile the glaze flows and pools in the firing to create incomparable depth and beauty. A Polychrome application adds even more. Watercolors have a crackled surface and come on a rustic field tile.

▲ Subject to acid etching.

● Not recommended for counter top use.

■ Not recommended for floor use.
